

RICHARD ENOCH ADESIYAN

Product Designer (UI/UX)

✉ enochrichard6@gmail.com ☎ +234 903 852 2066 📍 Lagos, Nigeria

🔗 [Richard Enoch](#) 🔗 [My Portfolio](#)

PROFESSIONAL SUMMARY

Product designer with **three years in product and six years in design overall**, across construction technology, fintech, publishing and a national professional body. I own the full arc: user research, problem framing, information architecture, user flows, wireframing, prototyping, high-fidelity UI, design systems, accessibility and developer handoff.

I trained as a Quantity Surveyor before I designed for the sector, so I understand what those users are trying to do before they explain it. I also write front-end code, which means my handoff is specified in terms engineers can build from, and my portfolio is designed and built by me.

I treat design as problem solving. If the problem is still there at the end, the work is not finished, whatever it looks like.

SELECTED PRODUCT WORK

- **ADLM Studio — Product Suite, Website and Design System** · **LIVE** — Audited 112 routes of a legacy application, then rebuilt the information architecture around visitor intent. The design system, marketing site, dashboard, admin surfaces and product UI followed from it. Quiv, a BIM take-off tool taken to v4, sits inside the suite.
richardenoch.com/projects/featured/adlm-studio
- **NIQS — Member Portal and Admin Platform** · **LIVE, IN USE** — Member portal, admin dashboard, role-based access model and digital library for a national professional body. A self-serve template library lets non-designers publish on-brand announcements without waiting on a designer.
richardenoch.com/ui-projects/niqs
- **YDPay — Mobile App Redesign** · **DELIVERED, NOT YET ADOPTED** — Redesign of 96 screens across 14 flows for a crypto fintech, covering onboarding, dashboard, deposits, transfers, trade, cards and transactions on a documented token system. The brand guideline from the same engagement was adopted and is in use. These screens have not been taken into build yet.

WORK EXPERIENCE

02/2022 – Present
Lagos, Nigeria

ADLM Studio
Creative Lead

Construction technology company building software and training for the built environment.

- Lead product design across the studio suite, including Quiv from concept through v3 to v4, informed by primary market research into BIM tool adoption in Lagos.

- Define and maintain the studio design standards and component libraries used across every client engagement.
- Built an AI-integrated design workflow from scratch using Claude Code, Figma and Magic UI MCPs, and a Figma to HTML to Figma loop deployed to Vercel.
- Work directly with engineers so design intent survives implementation, which reduces handoff rework.

02/2026 – 06/2026
Contract · Remote

YDPay

Creative Designer (Multidisciplinary)

Crypto fintech offering a virtual dollar card and gamified rewards.

- Led the end-to-end UI/UX redesign: 96 screens, 14 user flows, mapped journeys, and a documented token set covering type, colour, spacing and components.
- Designed SpinPop, a gamification feature with its own wallet and games lobby, and the referral dashboard system.
- Owned the visual language across customer-facing surfaces and used AI-assisted workflows to accelerate prototyping and component generation.

07/2025 – 03/2026
Remote, Nigeria

BookRion

UI/UX & Brand Designer

Africa-focused book platform connecting readers, authors, publishers and bookstores.

- Designed and maintained the interface system across web and mobile for Rion Prime, Young Rion and the Listing Portal, keeping patterns consistent across surfaces.
- Translated business goals and user research into wireframes, prototypes and high-fidelity designs, including the Community and Book Clubs experience.
- Ran usability testing, iterated on the findings, and designed to WCAG standards with product, engineering and content teams.

02/2026 – 06/2026
Contract · Remote

Whitespace Creatorverse

Creative Designer

Creative agency delivering branding, web and digital experiences for brands and creators.

- Designed responsive websites and digital platforms for fintech, wellness and creator-economy clients, working alongside developers and strategists.
- Contributed shared layout systems and a common design language used across agency client work.

SKILLS & TOOLKIT

Product & UX: User research, problem framing, personas, competitive analysis, journey mapping, information architecture, user flows, wireframing, prototyping, usability testing, accessibility (WCAG), mobile app design, responsive web design.

Design systems: Design tokens, component libraries, multi-theme systems, pattern documentation, design QA, cross-surface consistency.

Tools: Figma, FigJam. Adobe Photoshop, Illustrator, InDesign. Miro.

AI-INTEGRATED DESIGN

Claude Code, Figma MCP, Magic UI MCP. AI-assisted prototyping and design-to-code workflows. Vercel deployment.

SOFT SKILLS

Cross-functional collaboration · Stakeholder management · Project leadership · Written and verbal communication · Attention to detail · Mentoring.
